Quality

Big Balloon Nation only uses great quality latex balloons made from 100% natural latex — not plastic. Latex is harvested from rubber trees, which grow in rain forests, by cutting the tree's bark and collecting the latex in a cup.

They decompose as fast as an oak leaf in your backyard!

The rubber tree can produce latex for up to 40 years and harvesting latex doesn't hurt the tree and discourages deforestation because latex-producing trees are left intact.

Balloons can last between 1, 2, and even 3 weeks depending on environmental conditions.
